

# ICT Organics

CedarCure is a minimum risk pesticide compliant with the USDA National Organic Program. CedarCure is used as a drench in turf to control insect infestations.

CedarCure is labeled for use on: White Grubs, Mole Crickets, Ants, Armyworms, Billbugs, Chinch Bugs, Crickets, Cutworms, Earwigs, European Crane Flies, Grasshoppers, Leafhoppers, Millipedes, Pillbugs, Sowbugs, Sod Webworms, Ticks and other turf pests. CedarCure is produced from EPA 25b exempt ingredients.

- Works great on white grubs, fleas, ticks, and many other pests
- Produced from EPA 25b exempt ingredients
- Great for homes to hotels and restaurants
- Also for use in livestock housing and corrals
- Residential and commercial
- No clean up
- Low cost
- Pleasant smell
- Easy application
- Long lasting residual effects

DO NOT apply when temperatures exceed 85 F or when soil is dry or turf or plants are suffering from moisture stress, do not apply during heat of day. Apply every 3-5 wks or as needed.

Directions: Low rate: Mix 8 ounces CedarCure with 100 gallons of water. High rate: Mix 16 ounces CedarCure with 100 gallons of water. Mix will treat 50,000 sq ft. Apply mix at 2 gallons per 1000 sq ft. Water application into soil profile. A second application may be necessary for species that have multiple generations.

The applicator should wear a cartridge-type respirator (similar to those used for painting, sanding, etc). The applicator should be fully clothed wearing long sleeved shirts and pants. Remove all persons and pets from the area before application. Reenter application area when product has dried.
