

CedarCure™

Insecticide Concentrate for Turf and Landscapes

- Non-toxic around children, family and pets
- Proprietary neurodisruption™ NextGen technology
- EPA 25b exempt
- Provides 3 to 4 weeks of control on property
- Effective on egg and 1st instar life stages of grubs
- Will not stain walkways, patios, or pavers

What to expect: Control of mosquitoes, ticks, fleas, white grubs, mole crickets, ants, armyworms, billbugs, chinch bugs, crickets, cutworms, earwigs, European crane flies, grasshoppers, leafhoppers, millipedes, pillbugs, sowbugs, sod webworms, and other landscape pests.

Mode of Action:

Grubs – Exposure to the cedarwood oil formulation immediately triggers the erosion of the exoskeleton. Insects - **CedarCure™** will stifle the ability of the insects’ receptors to detect food, mates, and to reproduce. When these comfort levels are destroyed, insects become over whelmed and relocate.

CedarCure™ is a minimum risk pesticide compliant with EPA 25b. This product has not been registered by the US Environmental Protection Agency (USEPA). ICT Organics represents that this product qualifies as exempt from registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

Mix/Application Rate for Turf and Landscapes:

For use with ground application equipment, hand held and high volume application equipment.

Low rate: Mix 8 oz. of CedarCure with 100 gallons of water

High rate: Mix 16 oz. of CedarCure in 100 gallons of water

Turf: Apply mix at 2 gallons of per 1,000 sq. ft.

Landscapes: Ensure adequate coverage and spray until point of runoff

Mosquitoes:

Blower low rate: Mix 0.5 oz. of CedarCure per 6.25 gallons of water

Blower high rate: Mix 1.0 oz. of CedarCure to 6.25 gallons of water

Packaged in 16 ounce dispenser bottle, 10 bottles to a case

Do not apply when temperatures exceed 85°F or soil is dry or under stress. Apply every 3 – 5 weeks or as needed.

Active ingredients: Cedarwood oil
