

CedarCure™

ORGANIC TICK CONTROL to PROTECT YOUR ECOSYSTEM

CedarCure™

CedarCure™ will stifle the ability of the insects' receptors to detect food, mates, and to reproduce. Insects then become overwhelmed and relocate. Insect displacement interrupts the "egg laying cycle" eliminating new generations. **CedarCure™** is absorbed directly into the body affecting the insect's neurological systems, causing paralysis, confusion, and death. Applying **CedarCure™** consistently and persistently will create a barrier of re-entry and increase the desired results.

Benefits of CedarCure:

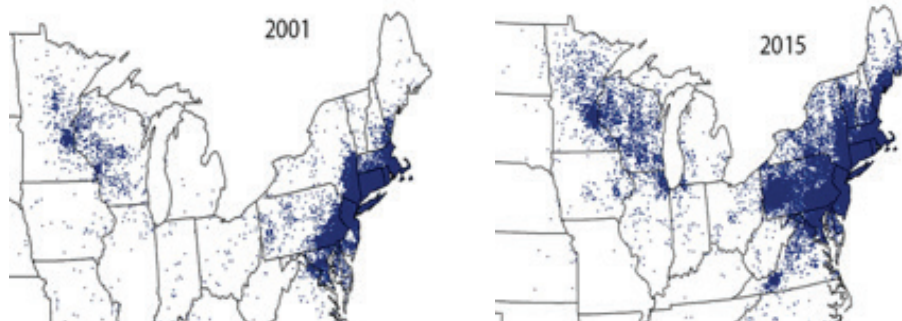

- Made from 100% organic ingredients and is non-toxic for children, pets, and wildlife
- Will not harm beneficial insects such as bees, butterflies, and earthworms
- Provides up to a month of repellency
- **Active ingredient: 76.5% Cedarwood oil**

Application Rates and Recommendations:

- Mix 0.25 oz.- 0.5 oz., of **CedarCure™** in 3 gallons of water which will treat approximately 15,000 square feet with a mist blower/sprayer
- Mix 8 – 16 oz. of **CedarCure™** in 100 gallons of water and apply 2 gallons of mix per 1,000 sq. ft. with ground, hand-held, or high volume application equipment
- Do not apply when temperatures exceed 85°F
- Apply every 3 – 5 weeks or as needed

CedarCure™ is a minimum risk pesticide compliant with EPA 25b. This product has not been registered by the US Environmental Protection Agency (USEPA). ICT Organics represents that this product qualifies as exempt from registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

Cases of Lyme disease as reported by the Centers for Disease Control:
