

CaFe⁺

A COMPLETE PROFESSIONAL PRODUCT LINE 100% ORGANIC FOR TURF, TREES AND LANDSCAPE

- A cost effective and quick acting soil buffer, Soluble calcium (Ca) and iron (Fe) mix
- Use when hot, to prevent disease and protect plants against heat stress
- Ensures strong cell wall structure
- Participates in metabolic processes of other nutrients uptake.
- Helps plants thrive by improving major nutrient uptake and providing the essential ingredients for increased photosynthesis

CaFe⁺ Soil buffer & micronutrient mix is a cost effective and quick acting soil pH buffer and micronutrient mix that helps plants thrive by improving major nutrient uptake and providing the essential ingredients for increased photosynthesis.

Calcium is an essential plant nutrient. It has many roles:

- Participates in metabolic processes of other nutrients uptake.
- Promotes proper plant cell elongation.
- Strengthens cell wall structure.
- Participates in enzymatic and hormonal processes.
- Helps in protecting the plant against heat stress.
- Helps in protecting the plant against diseases

MIX RATES: Mix 1 ounce of CaFe per gallon of water.
Apply mix at 2 gallons per 1000 sq ft
One gallon of CaFe concentrate treat 64,000 sq ft.
Cost: \$1.07 per 1000 sq ft

APPLICATION NOTES: For best results apply early in the growing season before disease become established. The key to effective plant health management is prevention. EPA 25b exempt and National Organic Program Compliant
