

# HALO™

## Selective Post-Emergent Herbicide Liquid

HALO™ is a selective post-emergent herbicide that is effective on a broad range of weeds, including but not limited to, Dandelion, Plantain, Clover, Ground Ivy, Knotweed, Purslane, Black Medic, Wild Violet, Foxtail, Curly Dock, Foxtail, and Catch Weed.

**Mode of Action:** Proteins and oils break down the plant cell wall.

**What you can expect:** Weeds will begin to wilt approximately 1 week after application and will die completely within 2 – 3 weeks. HALO™ will not harm cool or warm season grass.

WEEK 1

WEEK 2

WEEK 3

HALO™ is a minimum risk pesticide compliant with EPA 25b. This product has not been registered by the US Environmental Protection Agency (USEPA). ICT Organics represents that this product qualifies as exempt from registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

**Mix Rate:**

**Low Rate:** 7 oz Halo with 1.5 to 2 gallons of water per 1000 sq. ft.

**High Rate:** 10 oz Halo with 1.5 to 2 gallons of water per 1000 sq. ft.

**Spot spray:** 10 oz in 1 gallon of water

For optimal results, apply to weeds during early periods of growth, during warm, dry weather. Do not apply during windy conditions. Results vary depending on species being controlled.

**ACTIVE INGREDIENTS:** Eugenol and Clove Oil

**Packaged in 4 x 1 gallon jugs, 4 jugs per case, 48 cases per pallet (192 gallons)**

**Tote = 250 gallons**

**1 gallon treats 18,300 sq. ft. at the low rate and 12,800 sq. ft. at the high rate**

**Manufactured by ICT Organics**
